

Goal:

Informational, recommendation-based, website for Spanish soap operas. It is structured like a streaming website but focuses more on providing information on recommended shows than streamable content. Also, I want to connect how these novelas contribute to Hispanic culture and economy.

Landing page:

- Brief on telenovela history
 - How it contributes to culture
 - How it benefits the economy
 - How it influences other cultures

2nd page:

- Genre
 - Different recommended telenovelas (pick 3-4 most popular novelas)
 - open it up and provide a summary

Colors:

- Simple dark background
 - Most of the colors come from the series of posters
 - Texture comes from how the content is organized (I'm thinking it looks like an exhibition)

Some Telenovelas I recommend to Look up:

Melodramas

- “La Rosa de Guadalupe”
- “Rubi”
- “Teresa”

Musical/ Pop Band Groups

- “Rebelde”
- “La Reina del Flow”

Romantic Comedies

- “Betty la Fea”
- “Mi Corazon es Tuyo”
- “Las Tontas No Van al Cielo”

- “El Final del Paraíso”
- “Señora Acero”
- “Sin Senos No Hay Paraíso”
